WE DELIVER CONFIDENCE

TOP 3 ID MANAGEMENT PROBLEMS

FOR SCHOOLS TO AVOID

ID MANAGEMENT TECHNOLOGY FOR A SAFE SCHOOL YEAR

The use of information technology in education is vital to the success of students, instructors, and administrators.

At ADVANTIDGE, we have over 20 years of experience in the world of access control and ID management technology. Our team is the expert at applying secure access technology for schools and other educational organizations. We work with educational institutions of all types to design access control systems to fit their specific needs and budget. ADVANTIDGE helps public, private, religious schools, and education non-profits, by assessing their school security requirements and designing access technology systems to fit their needs.

Read about the top 3 problems that ADVANTIDGE helps schools address through our consultative approach.

WAITING FOR LARGE PRINTING JOBS

REPLACING OBSOLETE TECHNOLOGY

LIMITED CUSTOMIZATION OPTIONS

WAITING FOR LARGE PRINTING JOBS

Schools with a large influx of students or complex access requirements may find themselves with long wait times and complicated printing protocols to ensure they are compliant with regulations. Long waits and confusing processes for issuing IDs can cause distress among students, teaching staff, and administrators.

REPLACING OBSOLETE TECHNOLOGY

Using an outdated access management system can be dangerous. Hacking technology has reached the point that many legacy systems cannot provide the protection needed to prevent unauthorized access. ADVANTIDGE understands the need to maintain the safest possible campus while staying under budget. Our team helps schools design by utilizing modular systems so schools only upgrade the necessary components at a time.

LIMITED CUSTOMIZATION OPTIONS

Card design is a major area that requires customization. Not only do most schools require custom info like grade or age to be included in the card design, but color coding can also be a crucial part of a school's access management system. Certain states may also require additional info such as a phone or serial number.

ADVANTIDGE recently helped an educational non-profit design and implement a new system to issue custom ID badges to better identify who was attending their in-person events.

THE CONSULTATIVE APPROACH

Through our consultative approach we conduct assessments which help discover the gaps that schools may have in their access management system. Our team makes expert recommendations and directly addresses the unique problems and challenges of your organization. Furthermore, we provide project management and premium support for your ID management system, so that schools can focus on education.
