

VEOLIA WILL DEPLOY OVER 3 MILLION SMART WATER SENSORS IN FRANCE

[Regions](#)
[Countries](#)

- Over 3 million LoRa®-based water meters to be deployed over public LoRaWAN® networks
- Additional water sensors are scheduled for deployment in order to transition from pure metering to environmental services
- These solutions unify all water sensors in a multiservice connectivity network to support the digital transformation of water utilities

Benefit: Reduced water loss, optimized operations, increased customer satisfaction
