

VERTICAL M2M IS USING LoRaWAN® FOR SMART METERING AND SMART BUILDINGS

- REUNION Telereleve is an engineering company specialized in water infrastructure on Reunion Island
- Wanted to operate different sensors to offer smart building and meter-cash services to utilities
- Maddalena smart water meters, Adeunis sensors, and Strega smart valve connected one platform solution through a private LoRaWAN® network
- Advanced value-added services (for water leak detection in buildings, management and remote configuration of devices...)
- > 15,000 sensors and meters within 3 years

Benefits: front-end view for customers, new value-added services (water leak detections), and new services as LoRaWAN operator.

Connecting a Smarter Planet
