Transportation Electrification Advisory Services (TEAS) Program

Fleet electrification can be complex. TEAS helps businesses and organizations save time and access resources through hands-on planning and support – at no cost.

Transportation Electrification Advisory Services (TEAS) is an SDG&E® program that provides no-cost planning, guidance and resources to help businesses and organizations of all sizes transition medium- and heavy-duty vehicles to electric.

Support at every step

TEAS is available in four phases of support designed to help customers at every stage of fleet electrification.

Fleet Electrification Planning

- Understand fleet electrification basics and next steps
- Explore electric vehicle (EV) options for fleet operations
- Learn about EV charging types and charging strategies
- Estimate total cost of ownership and emissions benefits
- Learn about available public funding opportunities to reduce costs*

Pre-Energization Support

- Understand SDG&E pricing plans for EV charging
- Prepare sites for electrification and utility coordination

Post-Energization Support

- Optimize charging operations after vehicles are deployed
- Identify resources to train your staff

Utilizing Emerging Technology

- Assess advanced technologies and energy management systems

IMPORTANT: Funding information is provided for informational purposes only and does not guarantee eligibility or funding.

Is TEAS right for you?

TEAS is available to SDG&E customers located within SDG&E's service area who operate on- or off-road medium- or heavy-duty vehicles and equipment (Class 2a-8, 6,001 lbs. or greater). The TEAS program is available to fleet customers at any stage of electrification.

Eligible organizations may include:

- Schools and school districts
- Cities, counties and tribal governments
- Transit agencies
- Nonprofit organizations
- Private businesses

Eligible vehicles and equipment can include school buses, delivery trucks, shuttle vans, refuse trucks, work trucks, forklifts, cargo-handling equipment and more.

Whether you're exploring electrification, developing a transition plan or ready to deploy EVs, TEAS can help.

How to get started

Submit an Interest Form

Tell us about your fleet, vehicles and electrification goals. Takes about 5 minutes.

Meet with your TEAS advisor

We'll schedule a consultation to understand your needs and build a customized support plan, whether you're exploring options or ready to move forward.

Get hands-on support

Your advisor provides ongoing guidance through one-on-one consultations, tailored resources and digital planning tools as you progress through your electrification journey.
