

Effective:
March 31, 2025

RE: PRICE INCREASE EFFECTIVE MARCH 31 2025.

Executive Order 14195, effective February 4, 2025 has been amended to impose a 20% tariff in lieu of the previously communicated 10%. This escalated tariff is effective immediately.

As a result, we will be increasing list prices and special nets by 9% for all affected products effective March 31, 2025. Mirroring all other tariff increases we are unable to extend price protection, or honor backorders at pre-tariff pricing.

This pricing adjustment applies to select products in specific categories affected by the tariffs. Updated price lists will soon be available through your sales representative and [on our website](#). Additionally, a detailed document listing specific SKUs within these broader categories is available upon request.
